

VS-04

ACTION:

Kiplant VS-04 favors various enzymatic reactions that allowed the stabilization of the chlorophyll levels of plants. The application of Kiplant VS-04 has a very positive effect on plant growth, as in stimulation of seed germination or growth of all parts of the plant, root, stem and leaves. In general, the application of Kiplant VS-04 has a very positive effect on plant growth, as in stimulation of seed germination or growth of all parts of the plant, root, stem and leaves. Kiplant VS-04 provides a bio stimulant action that increases the root development, increasing root quantity and health, stimulates the defenses against various pathogens such as nematodes, in this situation, the result is significant and roots become healthier and vigorous.

Zero residue:

Kiplant VS-04 is a zero residue product, it does not have a safety period after its use, does not cause or induces any resistance to pathogens and does not affect the food chain. Kiplant VS-04 does not affect to auxiliary insects.

COMPOSITION:

Copper (Cu) water soluble	0,5% w/w
Copper (Cu) EDTA chelated	0,5% w/w
Zinco (Zn) water soluble	1,5% w/w
Zinco (Zn) EDTA chelated	1,5% w/w

Chelating Agent: EDTA

Stability range of the chelated fraction: pH (2-12).

Product allowed in organic farming as in regulation annex (ce) nº 834/2007 y nº 889/2008.

APPLICATION PROCEDURE:

Foliar application: 200-300 ml per 100 L of water

Root application: 3-5 L/hectare

CROPS:

Vegetables, vineyard, kiwi and fruit trees.

Available in packs of: 0,5L, 1 L and 5 L.
